Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisidictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - August 1975

Payments made out of Title XIX funds for August totalled 1.126 1/ billion dollars, a slight decrease from July. Average monthly payments for the year ending in August equalled $1.092 billion, a 1.5 percent increase over the average for the year ending in July.

During August, nearly 8.7 million recipients 2/ had medical vendor payments totalling $1.089 billion made in their behalf. Higher utilization of outpatient and other professional services, as discussed elsewhere in this report, may provide an explanation for the phenomenon of an apparent increase in recipients with no increase in payments over the preceding month.

There were concurrently 233,036 persons enrolled in health maintenance organizations whose premiums were paid out of Title XIX funds.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for August is as follows:

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
	Percent		
Total	100.0	75.9	24.1
Aged 65 and over	22.8	14.2	8.6
Blindness	0.5	0.4	0.1
Permanently and totally disabled	14.0	10.8	3.1
Children under 21 in families	33.4	29.8	3.6
Adults in families with dependent children	22.2	20.6	1.6
Other Title XIX under 21	3.3	xxx	3.3
Other Title XIX age 21-64	3.9	xxx	3.9

More than half (55.6 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other Title XIX recipients under 21 accounted for 36.7 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 22.8 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (26.7 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.6 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 18.4 percent (about half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (24.1 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility	Money Payment Status		
	Total	Money payment authorized	Money payment not authorized
	Percent		
Total	100.0	53.5	46.5
Aged 65 and over	37.2	10.5	26.7
Blindness	0.6	0.4	0.2
Permanently and totally disabled	24.1	15.2	8.9
Children under 21 in families	15.7	13.0	2.7
Adults in families with dependent children	16.2	14.2	2.0
Other Title XIX under 21	2.7	xxx	2.7
Other Title XIX age 21-64	3.6	xxx	3.6

Payments by Type of Service

Payments for outpatient and professional services continue to rise at a more rapid rate than those for inpatient services. The average monthly increase for non-inpatient services rose by 1.8 percent over the calendar year ending in July, compared to a 1.3 percent increase for inpatient services. Home health, outpatient and clinic services evinced the highest rates of increase. Payments for inpatient care comprised 69 percent of total vendor payments: hospitals (31.2 percent), skilled nursing facilities (20.0 percent) and intermediate care facilities (17.8 percent). Among other services, payments to physicians and for prescribed drugs accounted for 10.3 and 6.6 percent of all vendor payments. Payments to clinics, hospital outpatient departments and for home health services accounted for a combined 7 percent of the total.

Screening Services

Forty-nine States reported 156,944 children screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-six percent of the children screened were six years of age and older. About forty-nine percent of children screened had referrable conditions uncovered and ninety-two percent of those with conditions uncovered were referred for diagnosis and/or treatment.

1/ Includes total payments of $2,528,608 for Vermont and vendor payments of $2,488,608.

2/ Includes recipient counts of 78,978 for Colorado, 21,000 for Vermont, and 138,007 for Missouri, which were furnished by the States. Recipient estimate for Wyoming was based on average payments per recipient from prior months. North Carolina recipient count was inflated to reflect prescribed drugs.

ANNOTATIONS

1. The following definitions apply to the symbols appearing in the detailed tables:

   --- indicates no data reported.

   *** indicates that the percent was not computed because the base was too small.

   Z indicates that the percent was less than 0.05.

2. Arizona has no Title XIX program and is excluded from the tabulations. Vermont did not submit a report for August and is excluded from the tabulations.

3. Colorado, Missouri and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables.

4. North Carolina recipients and payments for prescribed drugs are not included in the tabulations.

5. States do not always report premium or per capita payments into the SSA system for the aged and disabled recipients separately, such as Georgia, Maine, and New York where the payments reported under the aged category include payments for the disabled. There is variance from month to month in States reporting HMO and SSA premium payments because in some cases, such payments may be made less frequently than monthly. Enrollees in HMO's were not reported by Utah.

6. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.

7. In addition to Colorado, Missouri, Vermont, and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate other title XIX recipients by age and is excluded from Table 14.

8. For Utah, all adult recipient i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients.

9. In some States, two or more types of medical services may be grouped together under one class, as in Connecticut where other practitioners' clinic, laboratory and radiological, home health, and family planning services are included in other care, and as in South Carolina, where skilled nursing facility services include payments to State mental institutions.

10. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9. For the current month, however, Michigan's expenditures exclude accounting adjustments of - $187,149. For Tennessee, all tables showing expenditure data include screening costs.

Annotations specific for Screening Tables 15-20

11. States omitted from tables either did not report on screening services for August 1975 or there were no individuals screened during the month.

12. California reported 76,905 individuals receiving comprehensive physical examinations in addition to the screening data.

13. Data for Massachusetts, Ohio, Rhode Island, Indiana and the District of Columbia are largely estimated and/or incomplete. Also for Rhode Island, data include 92 newborns, for whom payments are reflected in physicians' or hospital services. For Massachusetts, data include services for Medicaid newborns, foster children, and mentally retarded children enrolled in the State's special schools.

14. Payments for screening services were not reported by the District of Columbia, Maryland, Massachusetts, Michigan, North Dakota, the Virgin Islands and Puerto Rico and payments for Idaho, New York, Ohio, Pennsylvania, and Texas were not reported separately by age.
